

Do You Make Any Of These 9 Serious Manufacturing Errors?

1. Are your finished parts getting scratched?
2. Are you getting rejects from customers because of poor part quality?
3. Are you able to cut costs by running your CNC lathes completely unattended for hours at a time?
4. Can you keep your machines running long after your last employee has left for the night or for the weekend?
5. Do you use an accumulator that typically saves you at least \$50 per machine per hour?
6. Does your accumulator add 60 hours per week of additional production, typically adding \$3,000 per week to your revenue?
7. Are you losing business to other manufacturers, because you don't have this cost saving and can't bid low enough?
8. Are you losing business to offshore markets for the same reasons?
9. Are you having trouble attracting new customers?

We have your solution

And it's such a pretty picture

**Presenting The Lights Out Innovations
CNC lathe accumulator**

It doesn't call in sick and never asks for a raise

Our CNC lathe accumulator is a piece of equipment that you can always depend on. It's completely reliable, it never calls in sick, never takes a lunch break, and best of all... it never asks for raise. It just keeps on working hard, hour after hour, day after day, week after week, year after year.

**Now you can run your CNC lathes completely
unattended for hours at a time**

It will keep your machines running long after your last employee has left for the night or for the weekend.

**Very competitive pricing
It typically pays for itself within just weeks**

The accumulator, along with the knowledge from our newsletter, typically allows our customers to add 60 hours more per WEEK to their production. At an average of \$50 revenue per hour per machine – that's \$3,000 per week in additional revenue – the unit can pay for itself in one or two weeks.

Make more money and win more business

You can now quote a lower price per unit.

Its heavy duty construction, rugged, and dependable

Our CNC lathe accumulator is heavy duty, it's rugged and dependable. It's built to withstand years of abuse in the harshest production environments. It can be linked into the lathe's control for improved and easier use. In most cases, it can be painted and decal'd to match the customer's lathe for improved aesthetics and marketing for the shop.

Our reputation says it all...

- **We have been in business for 13 years exclusively selling production turning accessories.**
- **We have factory trained service technicians across the United States.**
- **We have full time phone support.**
